

Alt+Shift+Enter is the shortcut to enter to fullscreen

---

Ctrl+M+M to collapse a certain block of code

If you want to collapse all your code units or blocks to their definitions then the shortcut to achieve this is Ctrl+M+O or Ctrl+M Ctrl+O. This is also a very handy shortcut which helps a lot in development.

---

Ctrl+K+D  
Code Format

---

Ctrl+K+C comment Ctrl+K+U uncomment

---

Ctrl+W

Selecting a single word then line and then other lines within that block and then.

---

To build a solution just press Ctrl+Shift+B
